DIRECTIONS

Add one 142 gram bag per 1,800,000 litres of water. Carefully open foil package, and remove water soluble colorant bag, taking care not to rip the colorant bag. Dispose of foil package. Toss water soluble colorant bag into pond from shore. Disperses best when applied upwind. For dramatic appearance add additional bag(s) after waiting 12-24 hours. Longevity of color and application frequency varies depending on rainfall and pond conditions. Rates will be affected by water quality and turbidity. Retain usage rate records for future reference.

Water may be used for irrigation, aquaculture and recreational purposes, including swimming and fishing once dispersed. Treated water is safe for fish and wildlife. Will not stain or harm waterfowl, fish or livestock. Do not apply to water that may be used for human consumption. Do not apply to streams, rivers or bodies of water not under the control of the user. Wearing gloves is recommended.

Precautionary Statement: Avoid contact with skin, eyes or clothing. In case of contact immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists. If swallowed: Call a poison control center or doctor immediately for treatment advice.

Storage and Disposal: Store in original container in a cool, dry place. Ensure properly sealed for storage. Protect from freezing. Store in low humidity. Rinse foil bag, then offer for recycling or dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

CAUTION: KEEP OUT OF REACH OF CHILDREN AND PETS. READ AND UNDERSTAND LABEL PRIOR TO USE.
