BENEFITS: BEST™ PRO PRILLS™ 12-3-13 with 3% Iron

- Is a uniform homogeneous, granular fertilizer that supplies high levels of potash for increased disease resistance, protein production, formation and translocation of starches and sugars.
- Contains sulfate of potash for the turf manager who is concerned about excess chlorides in the soil.
- Contains 12% ammoniacal nitrogen and 17% sulfur to help lower soil pH levels and improve iron uptake and availability.
- Contains 3% iron to prevent chlorosis, a yellowing of new foliage, usually caused by high soil pH and iron deficiency.
- Is a homogeneous product (which means all the pellets have the same analysis). This helps eliminate streaking due to fertilizer segregation during shipping, handling, and spreading. Homogeneous pellets virtually eliminate the possibility of iron staining sidewalks or mow strips and cart paths, because the iron is not a separate highly concentrated pellet.
