

Controlling grass weeds in turf with

ARENA MSMA Herbicide

ACTIVE CONSTITUENT: 720 g/L MSMA

The Product

ARENA MSMA Herbicide is an aqueous concentrate containing 720 g/L of MSMA. It is a member of the organoarsenical group of herbicides with unknown and probably diverse sites of action. For weeds resistance management Arena MSMA is a **Group Z Herbicide**.

It is available in 10L plastic drums. As this product has a specific gravity of 1.4 (i.e. a 10 litre drum weighs approximately 15KG) it has been determined that a 20 litre (29KG drum) pack will not be initially offered for sale.

ARENA MSMA is a selective herbicide for controlling certain grass weeds in turf areas of couch and hybrid couch.

Suitable for fairway and broad acre applications **ARENA MSMA** is registered for control of **Paspalum, Summergrass and Crab Grass**.

Application rates are typically 6.6 L/Ha in 1000 litres of water. Split applications of 3.3 L/Ha in 1000 litres of water applied 7-10 days apart will reduce phytotoxicity. Weeds should be sprayed when they are young and actively growing. Repeat spray applications after 14 days may be necessary.

NB: ARENA MSMA Herbicide may cause some yellowing and discoloration of turf even when used as directed above. High temperatures will increase this phytotoxic effect.

DO NOT use on Bent, Queensland Blue Couch, Fescue, Blue Grass, Kikuyu or Dichadra.
