

NO BETTER WAY TO REPAIR WINTER TURF DAMAGE

Seed Aide® CoverGrow™ is the easy and convenient way to cover your seed for fast vegetation establishment. Whether you're spot seeding smaller bare spots, or hydroseeding larger areas, no other granular mulch is more effective.

Compared to competitive granular mulches, the reasons it's better are obvious:

- Better turf establishment
- +25% greater water holding capacity
- +25% faster water absorption
- +25% greater swell volume
- + Tackifier for better soil bonding to prevent movement during rain or irrigation

Mulching Granules

COVERGROW[™] IS THE BEST PERFORMING GRANULAR MULCH—PERIOD.

Profile[®] CoverGrow[™] is an advanced technology granular mulch made from recycled wood and cellulose fibers. Once applied to a seeded area and activated by water, the granules quickly expand and disperse to provide outstanding protection and water-holding performance right where it's needed.

3 WAYS TO APPLY

Hydroseeding

- Rapid dispersion and fast mixing in jet-agitated hydroseeders
- Easy application of the smooth-shooting, high-coverage slurry
- Resists rainfall impact; stays in place due to advanced tackifier technology

Broadcast with Spreader or by Hand

- Increased swelling, dispersion and coverage compared to leading dry applied pellets
- Smoother flowing for easy spreader application
- Stays in place due to advanced tackifier technology
