

RHIZOMATE™

HUMIC LIQUID CONCENTRATE (HLC) & WATER SOLUBLE GRANULE (WSG)

RhizoMate Humic Acid is a high quality, water soluble soil conditioner. It starts with sub-bituminous coal, a superior source of humin, and is “wet chemistry” activated rendering a soluble humic. The result is the finest humic available that can help:

- Increase root vitality
- Improved nutrient uptake
- Increased chlorophyll synthesis
- Better seed germination
- Increased fertilizer retention
- Stimulate beneficial microbial activity
- Healthier plants and improved yields

RhizoMate is available as a:

Humic Liquid Concentrate (HLC) ideal for tank mixing and spraying onto soil

&

Water Soluble Granule (WSG) that can be reconstituted and injected into the irrigation system

SoilPack™
