LIQUID THATCH TREATMENT

**TERRA LIFT**

# T-THATCH

LIQUID THATCH TREATMENT

Built-up thatch as a dead spongy vegetative mass developing on the soil surface, leads to a constant dampness that dissolves and traps nutrient, causing horizontal root growth and creating the ideal harbour for disease fungi. Applying T-Thatch will address the problems of accumulated organic matter (OM) and thatch.

## Benefits

- 1 Rebuild the natural disease suppression status of depleted soils
- 2 Minimise disease harbour beneath the surface
- 3 Re-establish nutrient and water flow to the rootzone

T-Thatch is a **two part** formulation of:

**Decomposing  
Enzyme solution**  
(5 litres)

**Digestion microbes**  
(5 litres)

Concentrated solution to rapidly breakdown thatch/OM into its cellulose, silicate and humate parts

To convert the decomposed thatch/OM into plant available nutrition and clear soil pore spaces for better aeration

# APPLICATION GUIDE

## 1. Regular OM Treatment

Apply once each season to consume accumulated organic matter created by the growth cycle.

☞ Standard rate: 10L/Ha

☀ Late Spring to Autumn

## 2. Scarifying and Verti-Cutting

Improve the results of scarifying and verti-cutting by following with a T-Thatch treatment.

☞ Standard rate: 10L/Ha

Heavy thatch: 20L/Ha

☀ Late Spring to Autumn

## 3. Standard Thatch Treatment

Apply to existing thatch to aggressively consume dead organic matter content, free up water/air movement and allow top-dressing sands into the profile.

☞ Standard rate: 10L/Ha

Heavy thatch: 20L/Ha

☀ Late Spring to Autumn

## 4. Intensive Thatch Program

For deep or layered thatch we recommend the following program:

☞ **Week 1:** Scarify/verti-cut 3mm deep. Follow with Rocastem 10L/Ha and T-Thatch 10-20L/Ha

**Week 3:** Verti-cut to 3mm. Apply T-Thatch 10-20L/Ha

**Week 5:** Verti-cut to 3mm

☀ Late Spring to Autumn

Pack Size  
10 litres

“ Working with old greens is always a constant battle in our environment, using T-Thatch has helped improve the surface quality of my greens as they are always firmer and truer after an application.”

**Matt Barden, Superintendent  
Parkes Golf Club**
