- Suitable for all soils and spray apparatus

Net Contents: 10 Liters

Weight Per Liter: 1.05 Kg / Liter @ 20°C

249381E GHSversion:16186

VERDIMATE™ *Fulvic Liquid Concentrate*

CONTAINS:

3% Fulvic Acid and 2% Humic Acid derived from sub-bituminous coal

DIRECTIONS FOR USE: Proper timing, rate and placement of VerdiMate™ Liquid Fulvic Extract is important for desired results and highly dependent on stage of crop growth, soil fertility levels and environmental conditions.

MIXING DIRECTIONS: VerdiMate™ Liquid Fulvic Extract is compatible with liquid fertilizers, micronutrients, pesticides and water. Addition of VerdiMate™ Liquid Fulvic Extract to these products should not be done without first testing compatibility on a small scale. When mixing with water, fill container half full, then add VerdiMate™ Liquid Fulvic Extract to the remaining water prior to the addition of buffering agents and pesticides. DO NOT tank-mix with carbonate-based pesticides, as efficacy decreases. Follow all directions on pesticide labels prior to mixing with VerdiMate™ Liquid Fulvic Extract.

AGRONOMIC and HORTICULTURAL USES: VerdiMate™ Liquid Fulvic Extract is ideal for foliar applications. Application rates will vary depending on soil conditions, plant type, nutrient requirement and application method. Consult your local agronomist for more information for your specific application.

SPRAY INSTRUCTIONS: Apply 5 Liters per hectare of VerdiMate™ Liquid Fulvic Extract diluted with 50 to 100 Liters of water

CAUTION: When combined with aqua ammonia, vapor releases may result in pressure build-ups. For such mixtures, only use mixing and application equipment that is vented and/ or has pressure relief valves. Ensure adequate agitation at all times.
