

# Vista™

**VISTA is designed to:** reduce and treat pond odor and stagnation. **VISTA** restores ponds to a natural ecological balance. **VISTA** contains highly selective strains of beneficial bacteria with Microbial Activation Technology to maintain water health and clarity.

**What to expect with VISTA:** reduction of organic matter and odor to create clean and clear water.

## VISTA DIRECTIONS FOR USE

Calculate Total Litres to be treated:

*Length x Width x Depth x 1000 = Total Litres*

Each bag of VISTA treats 900,000 Litres of water.

1. Calculate number of bags needed to treat pond:  
*Total Litres / 900,000 = Bags needed per treatment*
2. VISTA bags must be placed evenly throughout the water area that is treated.
3. Dosage can be reapplied every 3 – 5 days for desired water clarity and health.
4. Water temperatures must be over 7 °C for maximum effect.
5. For best results, treat early as water becomes stagnant.

For technical service contact your Simplot Partners representative.

**Simplot** WaterPack®

*Contains 60 Water Soluble Bags.*

## WATER MAINTENANCE

Ponds do not take care of themselves. That is why we recommend that every pond owner develop a personal water management product plan.

Monitor your pond weekly for clarity and floating material. This allows you to identify and respond to potential problems before they start.

**VISTA** is the product of choice for treating water with excess nutrients and organic materials.

## HEALTHY PONDS PRODUCTS

Achieve increased water clarity and improve water health naturally by using other Healthy Ponds products:

**AWAKE** for activating indigenous bacteria populations and supporting turf health;

**BLAST** for quick treatment of severely contaminated and stagnant water environments.

**AquaSpherePRO** Maintain your pond by using Healthy Ponds AquaSpherePRO, which is the easiest maintenance product on the market; it works 24 hours a day, seven days a week, for up to 30 days.
