## **ORGANIC BOOSTER**

**N : 3.1      P : 1.5      K : 1.6**

**“Certified Organic”** by the Biological Farmers of Australia.

Composted **POULTRY MANURE PELLETS**.

Provides nutrients and essential trace elements required for healthy plant growth.

Used by landscapers, golf courses, farmers and domestic gardeners alike.

Great for the whole garden, including lawns, shrubs, trees and vines.

Directions of use :

**Lawns** - Evenly spread 100 grams per sqm and water in well.

**Gardens, Trees, Shrubs and Vegetables** - Evenly spread 100-200 grams per sqm and water in well. For best results, mix into the soil before planting.

### **THE BENEFITS OF USING AN ORGANIC FERTILIZER**

When you use an organic fertilizer, you are supplying more than just a full range of nutrients and trace elements required for the growth of healthy plants. There are many other benefits which include :

- \* the slow release of nutrients, feeding plants for many months,
- \* increased earthworm activity,
- \* improved soil quality by increased water retention and aeration,
- \* increased levels of beneficial micro-organisms and bacteria,
- \* a safe and easy to use fertilizer that will not burn or damage plants,
- \* a pH neutral fertilizer.

**Organic Fertilizers are Environmentally Friendly  
and will not burn your plants!!**
