DIRECTIONS FOR USE GENERAL USE

Flush out sprayer with clean water. Half fill the spray tank and commence agitation. Slowly add the required quantity of Tank and Equipment Cleaner. Top up the tank and agitate vigorously for 15 minutes. Use hand lance or return hose (where suitable) to clean top of tank around filter basket etc. Open spray booms and spray out. With persistent chemicals or when cleaning at end of season allow mixture to stand overnight before spraying out. When sprayer is to be re-used immediately, re-fill the tank with water, agitate for 5 minutes and spray out. When storing sprayer for any length of time, do not give final rinse until required for use, as Tank and Equipment Cleaner leaves a protective film.

STAIN REMOVAL

To remove stubborn spray stains on the outside of the tank, on tractors or other machinery. Mix Tank and Equipment Cleaner in a bucket and, using rubber gloves, vigorously scrub the affected areas with the solution, using a stiff scrubbing brush.
